## WORK HISTORY | PROFESSIONAL EXPERIENCE

### Senior Software Developer | Pluralsight

Feb 2025 - Present

- Led project execution by aligning tasks with team strengths, ensuring timely delivery, and serving as the liaison between the team and leadership to drive progress and communication.
- Worked on large-scale data migration initiative, leveraging Kafka (topic creation, publishing, and consumption) with Node.js to ensure efficient and reliable processing of high-volume datasets.
- Improved team velocity in Jira by 25% through process optimisations, better sprint planning, and streamlined workflows, resulting in faster feature delivery and increased productivity.

### Senior Full Stack Developer | ThoughtsWin Systems

Aug 2023 - Nov 2024

- Designed and developed interactive dashboard and automated data analysis tools to enable stakeholder decision-making, resulting in a 34% boost in productivity.
- Streamlined workflows with custom data transformation rules, automating report generation and formatting for enhanced efficiency in client data migrations.

### Senior Software Developer | SHJ International

Nov 2020 - Dec 2022

- Developed a truck tracking and route planning platform for A Due Pyle's systems, resulting in a 20% increase in operational efficiency and reduced delivery times.
- Enhanced resource utilization by 12% by designing and programming advanced algorithms that optimized load distribution based on factors such as load size, weight, destination, and priority.
- Developed a 24-hour scheduled Lambda function to automate truck and load data updates from an S3 bucket to a database, reducing manual data integration time by streamlining the process.

### Full Stack Developer | Actonate IT Solutions

July 2018 - Nov 2020

- Developed an online medical consultation platform with key features such as appointment booking, chat, and image uploads. Enlisted 120 doctors and promptly began serving the requirements of hundreds of patients daily within the initial week of its release.
- Created an administrative dashboard utilized by 61 brands for conducting comprehensive audits of retail stores.
- Developed features such as creation of audit plans, assignment of auditors and verification of completed audits.
