SUMMARY

Adaptable engineer with 6 years of expertise in the JavaScript/TypeScript ecosystem (React, Node.js, Express) and a passion for scalable architecture. I specialise in solving complex technical challenges and leading cross-functional teams, recently driving a 25% increase in velocity through process optimisation and strategic mentorship. Committed to technical excellence and high-impact leadership, I am currently expanding my toolkit into Java and Go to architect the next generation of enterprise-grade backend solutions.

EXPERIENCE

Senior Software Developer

Pluralsight

February 2025 - Present

- Championed the recovery and modernisation of critical engineering domains by resolving long-standing technical blockers, systematically reducing technical debt through large-scale refactoring, and implementing performance optimisations that fortified platform reliability and CI/CD stability.
- Engineered a high-volume data migration architecture using Node.js and Kafka, designing scalable schemas and robust pub/sub pipelines to backfill legacy datasets while ensuring seamless downstream synchronisation and 100% data integrity.
- Boosted team velocity by 25% by restructuring project management workflows in Jira, utilising dependency analysis and adaptive sprint scheduling to optimise resource allocation and accelerate end-to-end feature delivery.

Software Developer

ThoughtsWin Systems

August 2023 - November 2024

- Automated a manual data migration process by developing an interactive Node.js and AWS-based analytics dashboard, streamlining stakeholder decision-making and driving a 34% increase in operational productivity.
- Leveraged Tableau and Microsoft Power BI to construct comprehensive data flow diagrams, aligning analytics efforts with project goals to support enhanced operational workflows.
- Established clear communication channels and utilized project management software to efficiently track progress and ensure timely completion of data migration requirements.

Software Developer

Clik2pay

March 2023 - August 2023

- Developed the user management functionality for merchants to add and delete users, which helped onboarding new clients that includes 407 ETR which in turn increased the revenue by 83%.
- Architected and enforced rigorous security protocols to safeguard the product against sophisticated attack vectors, including DoS mitigation strategies.
- Optimised application performance and user experience by resolving critical bottlenecks identified through New Relic and engineering a Grafana dashboard to deliver actionable, data-driven user analytics.

Full Stack Developer

SHJ International

November 2020 - December 2022

- Developed a truck tracking and route planning platform for A Duie Pyle's systems, resulting in a 20% increase in operational efficiency and reduced delivery times.
- Enhanced resource utilization by 12% by designing and programming advanced algorithms that optimized load distribution based on factors such as load size, weight, destination, and priority.
- Developed a 24-hour scheduled Lambda function to automate truck and load data updates from an S3 bucket to a database, reducing manual data integration time by streamlining the process.

Full Stack Developer

Actonate IT Solutions

July 2018 - November 2020

- Developed an online medical consultation platform with key features such as appointment booking, chat, and image uploads.
- Enlisted 120 doctors and promptly began serving the requirements of hundreds of patients daily within the initial week of release.
- Engineered a centralised administrative dashboard used by 61 brands to execute retail store audits, streamlining the entire lifecycle from audit planning and auditor assignment to final verification.

SKILLS

Tools: JavaScript, NodeJS, ReactJS, TypeScript, GraphQL, Git, SQL, Kafka, Python, HTML, CSS, REST, Java, JIRA, OOPS, AWS, Jest, TDD, Docker, ExpressJS, Algorithms, Data Structure, Nginx, Agile, Gemini, Antigravity, Copilot.

Leadership: Collaborating, Troubleshooting, Reliability, Self-starter, Project Management, Team Building, Communications, Problem Solving, Innovation, Decision Making, Public Speaking.

Relevant Experience: Front-end, Back-end, User Experience, Market Research, Customer Needs, Data Driven Product Strategy, Requirement Gathering, Product Life Cycle, Software Development.

EDUCATION

Master of Technology | Computer Science
National Institute of Technology • Bhopal, Madhya Pradesh, India • 2018

Bachelor of Technology | Computer Science
Guru Gobind Singh Indraprastha University • New Delhi, India • 2016

AWARDS & HONORS

Rapid Recognition Award
Pluralsight • 2025

- Awarded Two Rapid Recognition Awards for quick execution, problem solving, and consistency in delivery.

SPOT Bonus
SHJ International • 2021

- Received a SPOT Award for ownership shown in mission-critical work, fast learning curve, and ability to handle complex challenges confidently.
