WORK EXPERIENCE

Senior Software Developer | Pluralsight

February 2025 - April 2026, Bengaluru, IN

- Engineered high-volume migration architecture using Node.js and Kafka to process and backfill legacy datasets with 100% data integrity.
- Designed scalable pub/sub pipelines that improved real-time data orchestration efficiency, reducing downstream synchronisation latency by 50%.
- Accelerated feature delivery by 25% through optimised resource allocation, dependency analysis, and streamlined sprint scheduling.
- Systematically reduced technical debt by implementing architectural improvements and JavaScript best practices, resulting in a 40% decrease in production bug reports.

Software Developer | ThoughtsWin Systems

August 2023 - November 2024, Toronto, CA

- Architected a high-performance analytics dashboard using React and TypeScript, enabling users to perform complex, rule-based data transformations.
- Engineered an automated data processing engine using Node.js and AWS S3, replacing manual workflows and driving a 34% increase in operational productivity.
- Created modular computation functions using JavaScript to support customisable unit conversions and applied data refinement logic, delivering precise auto-computed reports within Node.js based systems.
- Optimised cloud-based data ingestion by integrating AWS SDKs for seamless file handling, reducing the end-to-end data migration and reporting cycle by 50%.

Full Stack Developer | SHJ International

November 2020 - December 2022, Indore, IN

- Developed a truck tracking and route planning platform for A Duie Pyle's systems, resulting in a 20% increase in operational efficiency and reduced delivery times.
- Enhanced resource utilisation by 12% by designing and programming advanced algorithms that optimised load distribution based on factors such as load size, weight, destination, and priority.
- Developed a 24-hour scheduled Lambda function to automate truck and load data updates from an S3 bucket to a database, reducing manual data integration time by streamlining the process.

Full Stack Developer | Actonate IT Solutions

July 2018 - November 2020, Vadodara, IN

- Developed an online medical consultation platform with key features such as appointment booking, chat, and image uploads. Enlisted 120 doctors and promptly began serving the requirements of hundreds of patients daily within the initial week of release.
- Engineered a centralised administrative dashboard used by 61 brands to execute retail store audits, streamlining the entire lifecycle from audit planning and auditor assignment to final verification.
- Implemented real-time monitoring dashboards using Grafana and New Relic, enabling prompt detection of issues.

EDUCATION

Master of Technology | Computer Science | NIT Bhopal | 2018

Bachelor of Technology | Computer Science | GGSIPU Delhi | 2016

SKILLS

Programming & Languages: JavaScript, Node.JS, React.JS, TypeScript, GraphQL, SQL, NoSQL, HTML, CSS, Java, Python, OOPS, Algorithms, Data Structure.

Tools: Kafka, REST, JIRA, Docker, ExpressJS, Nginx, Agile, Github, Gitlab, PostgreSQL, MySQL, Bitbucket, MongoDB

AWS: Lambda, S3, EC2, SNS, SQS, API Gateways, Cloudwatch, IAM

AI Tools: Copilot, Claude, Gemini

Soft Skills: Project Management, Communication, Problem Solving, Decision Making, Collaboration, Software Development, Code Review, Debugging, Code Quality
